Alpha 1

Content: 85

Excellent job guys. As you know, I am not a fan of your product. I am still not a fan of your product **but** that is not important. You did a great job showing that there is a market for it with a nice touch to get quotes from actual lecturers. This in essence shows that my opinion is a minority one: good job.

You also described the problem **very very** well.

Code: 85

Nice piece of coding.

It's a shame you couldn't get the interface working completely. I know from your minutes that you were thinking about it the right way (calling Sage as a library). Perhaps we could use code club next year to work on getting this working.

Delivery: 82

Excellent delivery. Alex you gave a brilliant introduction and as a group you all came across very well. You obviously prepared well for this and it came across: good job!

Visual Aids: 80

Good use of visual aids.

Creativity: 79

Very creative: well done!

General comments

Well done on a very solid piece of work guys and an **excellent** presentation.

A personal thank you for your efforts and engagement.

Overall Mark: 82/100
