

# Immediate Feedback on Project Presentation

**Company name:**

RACH

**Content: 56**

These seemed rather unfinished. Your problem was well introduced although I am not sure you offered the correct solution.

**Code: 65**

Basic use of code. Generating symbols is not the correct way to go. You want to generate the correct LaTeX code and then use either a phone based LaTeX server or Mathjax.

**Delivery: 67**

Could have been better rehearsed.

**Visual Aids: 65**

Ok use of visual aids.

**Creativity: 75**

Nice idea.

**General comments**

Seems like this was all left a bit late.

**Overall Mark: 66/100**
