

# Immediate Feedback on Project Direction

(This is some feedback to make sure your project is on the right track: you will be given detailed a mark and detailed feedback asap.)

## **Company name:**

MIPE.

## **Technical aspects:**

Not much thought has been given to the technical aspects of this work. You state that you will use HTML: this will not contribute to the Code part of the mark as HTML is not a coding language but a markup language. Also it won't be possible to have quizzes using HTML. Take a look at javascript.

## **Initial comments about write up:**

Poorly written with a lot of errors.

## **Initial comments about strategy:**

Not very detailed but good use of resources to gain some knowledge about market.

## **General comments**

A lot of work needs to be done on the coding aspect. Take a look at Coursera and Udacity.
