

# Immediate Feedback on Project Direction

(This is some feedback to make sure your project is on the right track: you will be given detailed a mark and detailed feedback asap.)

## **Company name:**

Promis

## **Technical aspects:**

No technical details what so ever are given.

Are you actually going to code a website or a gui?

If the first, you will need to learn some basic javascript (potentially django but that might be too advanced given your time constraints).

If you want to build a gui you will need to learn how to use wxpython.

Game development is difficult. Take a look at 'Python for kids' (a book). You also mention in your report that you would potentially have players playing online against each other: that is very tricky to get right.

## **Initial comments about write up:**

Messy, unclear and mainly offers opinion.

## **Initial comments about strategy:**

I am not sure you have a strategy and am not in fact sure you know how to do what you want to do.

## **General comments**

You should clearly agree on tasks that need to be completed in the coming weeks: agree on a strategy (have a go at a business canvas), agree on the technical aspects and get going.
