

Immediate Feedback on Project Direction

(This is some feedback to make sure your project is on the right track: you will be given detailed a mark and detailed feedback asap.)

Company name:

Jenny Ca\$h

Technical aspects:

On a technical note you **will** need more than just HTML to get marks for code (HTML is not really code it's a markup language).

It sounds like you'd want to use Django but this might be a bit ambitious given the time you have left, in which case you can 'just' have the working python code (which will eventually fit in Django).

Feel free to have a chat with me to clarify that.

Initial comments about write up:

Well written.

Initial comments about strategy:

HUGE DISCLAIMER: Be sure to cover yourself legally and ethically. Seek some advice about the legality of your product (Neil might be able to help).

Also, consider ethical issues, your product encourages gambling: is that a good thing?

General comments

Be careful with legal aspects!

Consider technical points I mentioned above.
