

Immediate Feedback on Project Direction

(This is some feedback to make sure your project is on the right track: you will be given detailed a mark and detailed feedback asap.)

Company name:

Ject.

Technical aspects:

You have not considered any technical aspects. This is rushed and very poor. As you plan on making this client side based (as opposed to being 'in the cloud') you will need to learn how to code a GUI.

You do not know what Ruby is. I'm not sure you know what LaTeX is.

Initial comments about write up:

This is rushed and mainly offers opinions.

Terribly referenced (if you attended Helen's lecture on referencing you most certainly did not listen).

Initial comments about strategy:

Not sure I see the strategy. This needs to be addressed.

General comments

You have a lot of work to do.
