Immediate Feedback on Project Presentation

Company name:

Ausfall

Content: 55

Ok idea with very basic market research carried out. Big weakness is (as I pointed out) the potential for errors in your materials. Perhaps building a learning community would be a better idea?

Code: 59

Very basic code used.

Delivery: 50

This is the big weak point of your project. Some of you presented well whilst others came across extremely relaxed (too relaxed) and not in a professional manner. Similarly it's a great shame that you were talking amongst yourself during the talk itself.

Visual Aids: 56

Basic visual aids.

Creativity: 60

Ok idea.

General comments

The presentation should have been better rehearsed. You came across as not caring about the project.

Overall Mark: 56/100
